

## What's in the box?

---

We provide:

- (1) BoilerScope®
- (1) 24VDC power supply
- (1) Short DIN Rail + screws
- (1) 3-foot Ethernet cable
- (1-4) adapters, depending on the number of boilers to be monitored
- Installation Instructions

## What do you provide?

---

- Cable:
  - Minimum: Two-wire cable (at least 24 AWG) to connect the BoilerScope® to a boiler and the boilers to one another.
  - Ideal (especially in areas with electrical noise): Cable with at least one twisted pair. Cat5 cable works just fine. There are more than enough wires, but the cable may be handy.
- Small Phillips and flat-head screwdrivers.
- Wire strippers.
- A boiler or two...
